---

1. Welcome

Welcome to the Acctos AI Dashboard, the command centre for your AI-powered document processing. This guide will walk you through every feature step by step.

What You Can Do

- View your real-time PDF page and Excel row consumption
- Purchase additional processing capacity when needed
- Manage your team's access to the dashboard
- Submit support requests
- Configure your Make.com and Azure integrations

---

2. Registration & Login

Creating Your Account

Step 1. Open the Acctos AI Dashboard in your web browser.

Step 2. Click **"Create one now"** beneath the login form.

Step 3. Fill in the registration form: - **Your Name** — your full name - **Organisation Name** — your company or team name - **Email** — your email address (used for login) - **Password** — choose a secure password

Step 4. Click **"Create Account"**.

Step 5. You will see a success message. Switch to the **"Welcome Back"** tab and log in with your email and password.

You are now the **Organisation Owner** with full administrative access.

Logging In

Step 1. Enter your email and password.

Step 2. Click **"Sign In"**.

Step 3. You will be taken to the Usage Dashboard.

Switching Organisations

If you belong to multiple organisations:

Step 1. Click the organisation name in the top navigation bar.

Step 2. Select the organisation you want to view.

Step 3. The dashboard updates immediately to show that organisation's data.

---

3. Navigating the Dashboard

The main navigation bar on the left side provides access to all sections:

Icon	Page	What It Does
Chart	**Usage**	Monitor your document processing consumption
Card	**Billing**	Manage subscriptions and add-ons
Headset	**Support**	Submit and track support tickets
People	**Users**	Manage team members (admin only)

Top bar features: - **Organisation selector** — switch between organisations (if applicable) - **Language toggle** — switch between English and Bulgarian (EN / BG) - **Logout button** — sign out of your account

Pause Notification Banner

If your automated workflows have been paused due to reaching your usage limit, a **red banner** appears at the top of every page:

> *"You've reached your current usage limit, and your agent has been temporarily paused."*

This banner disappears automatically once capacity is restored.

---

4. Monitoring Your Usage

Viewing Current Usage

Navigate to the **Usage** (Dashboard) page. You will see two main tabs:

Document Usage tab shows: - **PDF Pages Spent** — a progress bar and number (e.g., 508 / 5,000) - **Excel Rows Used** — a progress bar and number (e.g., 431 / 5,000) - A daily chart showing usage over the selected time period - Monthly usage history table

Infrastructure Usage tab (admin only) shows: - Make.com credits consumed - Azure Document Intelligence costs - OpenAI token costs and estimated cost in euros

Changing the Time Range

Above the charts, you can select: - **Last 7 days** — shows the past week - **Last 30 days** — shows the past month - **Custom** — enter a specific number of days (1-30)

Click **"Apply"** after entering a custom value.

Exporting Data

Click the **"Export"** button to download a CSV file of your raw usage events.

Syncing Latest Data

Click **"Refresh / Sync"** to pull the most recent usage data from Make.com. This is useful if you want to ensure the dashboard is completely up to date.

---

5. Managing Your Subscription

Viewing Your Current Plan

Navigate to the **Billing** page. At the top, you will see: - Your current usage for the billing period - The plan name (e.g., "Professional Plan") - The next reset date

Subscription Plans

Scroll down to the **Subscription Plans** section to see available plans:

Plan	Monthly Price	PDF Pages	Excel Rows
Starter	£249	1,000	1,000
Professional	£989	5,000	5,000
Enterprise	£2,499	15,000	15,000

Your current plan is highlighted with a **"Current Plan"** badge.

Upgrading Your Plan

Step 1. Find the plan you want to upgrade to.

Step 2. Click **"Upgrade to [Plan Name]"**.

Step 3. Complete payment on the Stripe checkout page.

Step 4. Your new limits take effect immediately.

Downgrading or Cancelling

To downgrade or cancel your subscription:

Step 1. Navigate to the **Support** tab.

Step 2. Select **"Downgrade/Cancel subscription"** as the issue type.

Step 3. Describe your request and click **"Submit Request"**.

Our team will process your request promptly.

---

6. Purchasing Add-on Capacity

Add-ons give you extra capacity on top of your base plan without upgrading.

How to Purchase

Step 1. Navigate to the **Billing** page.

Step 2. Scroll to the **Add-ons** section.

Step 3. Choose your add-on: - 1,000 or 5,000 additional PDF Pages - 1,000 or 5,000 additional Excel Rows

Step 4. Click **"Purchase [add-on name]"**.

Step 5. Complete payment on the Stripe checkout page.

Step 6. Your add-on credits appear immediately on the billing page.

Understanding Add-on Bars

On the Billing page, you will always see four progress bars:

1. **PDF Pages Used** — your base plan consumption (e.g., 508 / 5,000)
2. **Custom PDF Pages** — your add-on consumption (e.g., 0 / 0 or 200 / 1,000)
3. **Excel Rows Used** — your base plan consumption
4. **Custom Excel Rows** — your add-on consumption

Before purchasing an add-on:

```
Custom PDF Pages:    0 / 0
```

After purchasing 1,000 pages:

```
Custom PDF Pages:    0 / 1,000
```

After consuming 600 of your add-on pages:

```
Custom PDF Pages:    600 / 1,000
```

After consuming all 1,000 add-on pages (auto-reset):

```
Custom PDF Pages:    0 / 0
```

Key Facts About Add-ons

- Add-on credits are consumed **before** your base plan quota
- Multiple purchases stack (buying 1,000 twice = 2,000 total)
- Unused credits **expire** at the end of the billing period
- When fully consumed, add-on bars reset to 0/0 automatically
- If your workflows were paused, they **resume automatically** after purchase

---

7. Understanding Usage Limits

Your Total Capacity

```
Total Pages = Base Plan Pages + Add-on Pages
Total Rows  = Base Plan Rows  + Add-on Rows
```

Example: - Professional plan: 5,000 pages, 5,000 rows - Add-on purchase: 1,000 pages - **Total: 6,000 pages, 5,000 rows**

When You Reach Your Limit

1. Your Make.com processing workflows **pause automatically**
2. A **red banner** appears across the dashboard
3. No new documents will be processed
4. Documents currently being processed will complete

Restoring Capacity

Method	How	Time to Resume
Purchase add-on	Buy pages or rows on the Billing page	1-2 minutes
Upgrade plan	Upgrade to a higher tier	Immediate
Wait for reset	Billing period resets on the 5th of each month	Automatic on reset date

Billing Period

- Runs from the **5th of each month** to the **4th of the next month**
- On reset day: usage counters go to 0, add-on credits expire, paused workflows resume
- Monthly history is preserved permanently in the history table

---

8. Managing Your Team

Requires Administrator or Organisation Owner role.

Viewing Team Members

Navigate to the **Users** page to see all members of your organisation, including their name, email, and role.

Adding a Team Member

Step 1. Click **"Create User"** in the top right.

Step 2. Fill in the form: - **Full Name** — the user's display name - **Email** — must be unique across the platform - **Password** — minimum 8 characters - **Role** — select the appropriate access level

Step 3. Click **"Create"**.

The user can now log in immediately.

Changing a User's Password

Step 1. Find the user in the list.

Step 2. Click the **key icon** (lock) in the actions column.

Step 3. Enter the new password in the modal that appears.

Step 4. Click **"Save"**.

Removing a User

Step 1. Find the user in the list.

Step 2. Click the **delete icon** (trash) in the actions column.

Step 3. Confirm the removal in the dialog.

The user will immediately lose access to this organisation. If they belong to other organisations, those are not affected.

Role Reference

Role	Can View Usage	Can View Billing	Can Manage Users	Can Adjust Credits
Organisation Owner	Yes	Yes	Yes	Yes
Admin	Yes	Yes	Yes	Yes
Billing Admin	Yes	Yes	No	No
Member	Yes	Limited	No	No
Read Only	Yes	Yes (view)	No	No
Support Agent	Yes	No	No	No

---

9. Getting Support

Submitting a Support Request

Step 1. Navigate to the **Support** page.

Step 2. Select the issue category that best matches your problem: - **System not working** — the document processing system is not functioning - **Files issues** — missing files, incorrect data extracted, or other data quality problems - **General support** — any other question or request - **Downgrade/Cancel subscription** — request to change or cancel your plan

Step 3. (Optional) Add a detailed description of your issue.

Step 4. Click **"Submit Request"**.

Step 5. You will see a confirmation message. Our support team will review your request and respond as soon as possible.

Following Up

Return to the Support page to view your submitted tickets and any responses from the support team.

---

10. Configuring Integrations

Requires Administrator role.

Make.com Setup

Step 1. Navigate to the **Usage Dashboard**.

Step 2. Click **"Settings"** to expand the integration panel.

Step 3. Enter your credentials: - **API Key** — your Make.com API token - **Organisation ID** — your Make.com organisation identifier - **Folder ID** (optional) — filters which scenarios are managed

Step 4. Click **"Test Connection"** to verify your credentials work.

Step 5. Click **"Save Settings"**.

Azure Document Intelligence Setup

Step 1. In the same settings panel, enter your Azure credentials: - **API Key** — your Azure Document Intelligence subscription key - **Endpoint** — your Azure resource endpoint URL

Step 2. Click **"Test Azure Connection"**.

Step 3. Click **"Save Settings"**.

Connection Indicators

The dashboard shows connection status indicators: - **Green checkmark** — connection verified successfully - **Red warning** — connection failed, check credentials

---

11. Administrator Tools

These features are only visible to Organisation Owners and Admins.

Adjusting Usage Credits

On the **Billing** page, the **Adjust Usage** section allows you to manually modify the consumed pages or rows:

Step 1. Enter a positive number to add usage, or a negative number to remove usage.

Step 2. Click **"Apply"** for either PDF Pages or Excel Rows.

Step 3. The usage display updates immediately.

This is useful for correcting erroneous usage data or crediting back processing that failed.

Simulating Add-on Purchases (Testing)

In the **Test Payments** section, you can: - Click **"+ Credit 1,000 rows"** or **"+ Credit 1,000 pages"** to instantly add add-on credits without going through Stripe - Use Stripe test-mode payment links to test the full payment flow

Resetting Usage

The **"Reset Pages & Rows"** button on the Dashboard: 1. Snapshots current monthly data to permanent history 2. Deletes all usage events and aggregates 3. Resets counters to 0 4. Resumes any paused Make.com scenarios

Warning: This action is permanent and cannot be undone.

Resetting Custom Credits

The **"Reset Custom Credits to 0"** button clears add-on credits without affecting base plan usage.

Pausing / Resuming Scenarios

The **"Pause Scenarios"** and **"Resume Scenarios"** buttons on the Dashboard allow manual control over Make.com workflows independent of usage limits.

---

12. Troubleshooting

"Agent Paused" Banner Won't Go Away

Cause: Your usage has reached the total limit (base plan + add-ons).

Solution: Purchase add-on capacity or wait for the billing period reset. The banner disappears automatically within 1-2 minutes of restoring capacity.

Usage Numbers Don't Look Right

Cause: Data may not have synced from Make.com yet.

Solution: 1. Click **"Refresh / Sync"** on the Dashboard 2. Wait 30-60 seconds for the data to update

Can't Access the Users Page

Cause: Your account does not have Administrator privileges.

Solution: Ask your Organisation Owner to upgrade your role.

Make.com Connection Test Fails

Possible causes: - API key is incorrect or expired - Organisation ID doesn't match your Make.com account - Make.com is experiencing service issues

Solution: Verify your API key in the Make.com dashboard, ensure the Organisation ID is correct, and try again.

Purchased Add-on but Scenarios Didn't Resume

Cause: The auto-resume check runs on the next usage-status poll (up to 60 seconds).

Solution: Wait 1-2 minutes. If scenarios still haven't resumed, click **"Resume Scenarios"** manually on the Dashboard (admin only).

Can't Find the Billing Page

Cause: Your role may not have billing access.

Solution: Contact your Organisation Owner for assistance.
